

IPBRICK.CAFE

Digital Workplace

IPBRICK.CAFE is a **digital, private and secure space** that provides tools to **simplify communication and exchange of information** in real-time.

Choose how you want to work

IPBRICK.CAFE integrates with the Unified Communications solution (IPBRICK.UCoIP) simplifying the way your company communicates

voice

video

chat

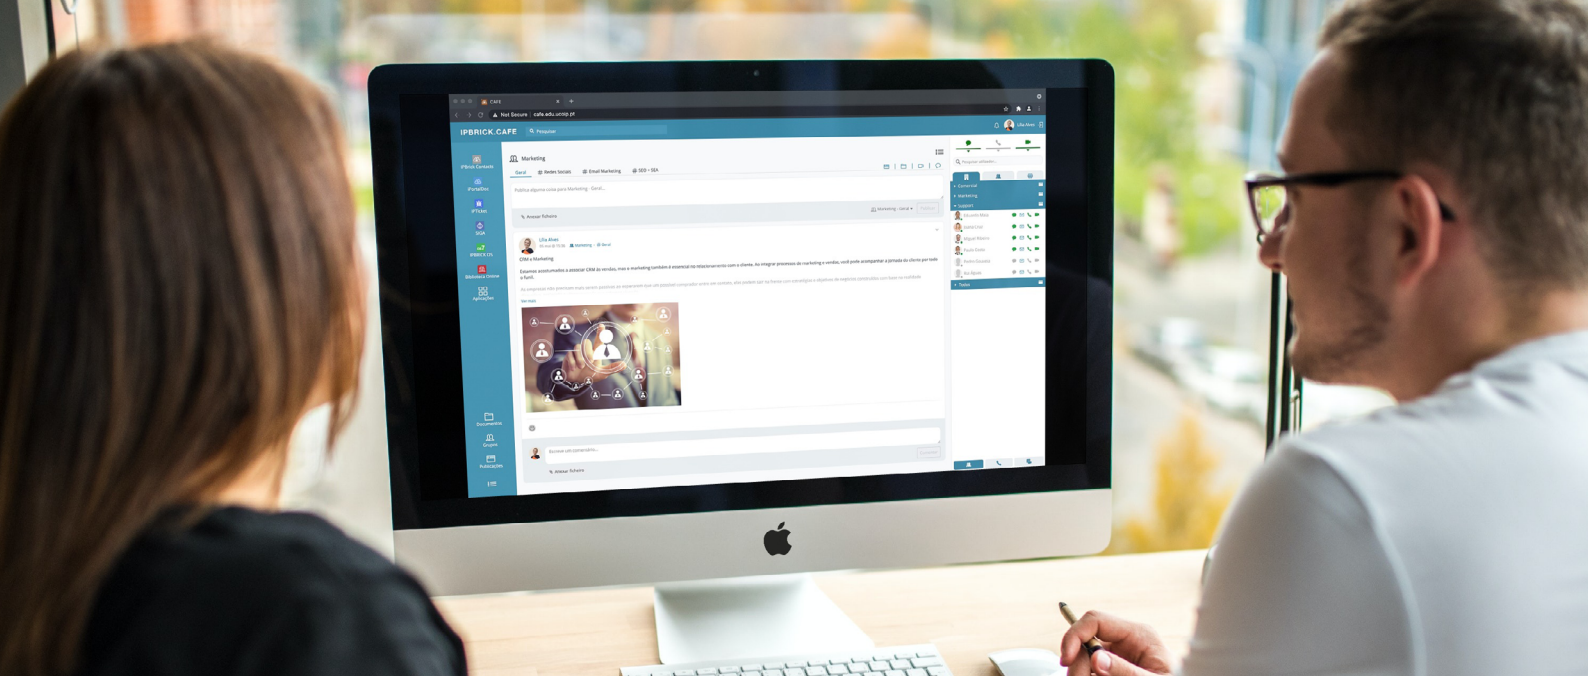

e-mail

Boost your company's efficiency with all the tools gathered in one place

The ability to communicate and reinforce collaboration between teams is essential for companies to remain in the market, especially in an increasingly digital era.

Having **easy access to information and work tools** from a single application is the key to keeping workers focused on their responsibilities and the best way to carry them out, avoiding delays and promoting immediate task resolution.

Boost the work of your teams

IPBRICK.CAFE provides a common **Feed** for the entire company that provides a comprehensive view of updates and centralization of information exchanges. With the “Channels” functionality, workers can be **grouped by theme, project, team** or other distinction relevant to the company. Here you can **share documents, collaborate directly on them, exchange chat messages and hold video conferences**. The information exchanged on each Channel is always accessible for participants to consult.

Promotes communication and transparency, allowing users to view availability across different communication channels through a multi-channel Presence Management System.

The application also has a **voting** area, a **news** area, allows the management of the user's account and profile (follow me, voice mail, files) and the creation of **polls**.

Access to other work applications is made possible through the **Single Sign-On system**.
